

HULTAFORS GROUP

Declaration in accordance with article 33 of the REACH Regulation (EC) No. 1907/2006 and Substances of Very High Concern, SVHC

Pursuant to the European Union Registration, Evaluation, Authorization of Chemicals Regulation 1907/2006/EC (REACH), HULTAFORS has an obligation to inform about certain substances contained in our products that are manufactured in or imported into the European Union. Where an article contains any substances of very high concern (SVHC) and is identified in a concentration above 0.1 % weight by weight (w/w), HULTAFORS is obligated to provide sufficient information to allow safe use of the article including, as a minimum, the name of that contained substance.

The complete and latest list of SVHCs can be found on the ECHA website:

<https://echa.europa.eu/web/guest/candidate-list-table>

Lead [CAS No. 7439-92-1] has been added to the SVHC list on the 27th of June 2018. Lead is a substance commonly used in copper, steel, brass and aluminum alloys. A variety of HULTAFORS products use these alloys, with a lead concentration above the set threshold.

The main routes to lead exposure are ingestion and inhalation. Permeation via skin is minimal, in particular when the substance is contained in a metal matrix. In normal conditions of use, users of the products made by HULTAFORS can only come in contact with this substance by physical contact [as any welding or metal removal operation would compromise the integrity of the product].

Below is a list of the HULTAFORS products containing components with lead in a concentration above 0.1% w/w. If further clarifications are needed please contact your HULTAFORS sales representative.

The information provided in this statement is true and complete to the best of knowledge.

| Article number | Name | Model | Substance name and CAS No. | Concentration |
|----------------|--------------------------|-------------------|----------------------------|---------------|
| 200904 | FIBREGLASS FOLDING RULE | G59-1-4-12 GU | Lead 7439-92-1 | >0,1% |
