

Kronos is the smallest wooden AMAZONAS hammock frame. Just like the larger models, it is made of spruce wood and weatherproofed for years of use via dip impregnation and galvanized fittings. Due to the especially developed chain suspension, Kronos is adjustable for hammocks with a total length between 270 and 320 cm.

AMAZONAS uses wood from sustainable European state forests for the manufacture of their products. These forests are managed using the criteria of the Forest Steward Council (FSC) as a guideline.
